

Automatic PET Bottle Blowing Machine

This automatic PET bottle blowing machine is designed for high-volume production. It features a multi-cavity mold system, automated preform loading and bottle ejection, and a programmable logic controller (PLC) for precise control of the blowing process.

Product Overview

High-Efficiency Production

The Automatic PET Bottle Blowing Machine is engineered for high-volume production requirements across the beverage, food, and packaging industries. It features a robust multi-cavity mold system and fully automated preform loading and bottle ejection processes to maximize throughput. With an integrated programmable logic controller (PLC), operators can achieve precise control over the blowing cycle for consistent, high-quality output.

Technical Specifications

Model Number	CSD-2P-4
Control System	PLC (Programmable Logic Controller)
Automation Capabilities	Automated Preform Loading, Automated Bottle Ejection, Multi-Cavity Molding

Application

Target Industries

- Beverage Industry
- Food Packaging
- General Packaging
