

Automatic Plastic Bag Making Machine

This automatic bag making machine is designed for producing plastic bags with three-side sealing. Equipped with a computer control system, this machine ensures precise and efficient bag production.

Product Overview

High-Precision Automatic Bag Production

This automatic bag-making machine is engineered for high-efficiency production of three-side sealing plastic bags. Utilizing an advanced computer control system, the machine ensures precise sealing and consistent quality for diverse packaging applications. It is an ideal solution for manufacturers seeking to streamline their bag production processes with reliable, automated technology.

Technical Specifications

Automation Level

Fully Automatic

Sealing Type

Three-side sealing

Control System

Computer-controlled

Applications

Primary Applications

Plastic Bag Manufacturing, Packaging Industry, Three-side Sealing
