

Automatic Plastic Bottle Rinsing Machine

This automatic bottle rinsing machine is designed for high-speed cleaning of plastic bottles. It features a stainless steel frame with transparent safety enclosures and adjustable rinsing parameters suitable for various bottle sizes and shapes, making it ideal for beverage, pharmaceutical, and cosmetic industries.

Overview

High-Efficiency Bottle Cleaning Solution

This automatic bottle rinsing machine is engineered for high-speed, reliable cleaning of plastic containers. Featuring a robust stainless steel frame and transparent safety enclosures, it offers both durability and operator safety while maintaining full visibility of the rinsing process. Designed for versatility, it is an ideal solution for production lines in the beverage, pharmaceutical, and cosmetic industries.

Technical Specifications

Suitable Industries

- Beverage
- Pharmaceutical
- Cosmetic

Frame Material	Stainless Steel
Safety Features	Transparent Safety Enclosure, Operator Protection

Operation

Compatibility

Various Bottle Sizes • Various Bottle Shapes

Control System	Adjustable parameter control panel
Cleaning Mechanism	Multi-nozzle high-speed rinsing
