Overview

Fully-Automatic Case Lining Solution

This fully-automatic liner placer is designed to streamline packaging operations by inserting poly liners into cases or boxes with high precision. The system automatically cuts and seals film from roll stock, inserts the bag, cuffs it over the case flaps, and uses air to ensure a perfect fit against the internal walls. Engineered for efficiency, this machine significantly reduces labor and material costs while maintaining consistent packaging quality.

Performance Metrics

Placing Capacity

7 cartons/min
Standard Capacity

12 cartons/min
High-Speed Option

Technical Specifications

Applicable Case Dimensions	L250-550 x W200-400 x H150-400 mm
Film Width	840 mm
Power Supply	3 phase, 4.5 kW
Compressed Air Consumption	100 NL/min
Compressed Air Pressure	6 bar

Physical Dimensions

Machine Dimensions	L3322 x W2177 x H2350 mm
