

# Automatic Pouch Filling and Sealing Machine

This machine automatically fills liquids or semi-liquids into pre-made pouches. It features a multi-head filling system and stainless steel construction, suitable for food, beverage, and cosmetic applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Pouch Packaging

This automatic pouch filling and sealing machine offers a modern, reliable solution for packaging liquids and semi-liquids. Utilizing hydraulic pressure for consistent filling and advanced pneumatic controls for precise sealing, it ensures an elegant and uniform product appearance. Designed with stainless steel for hygiene, this machine is ideal for food and beverage applications, extending shelf life up to three months after sterilization.

## Technical Capabilities

### Core Features

- Hydraulic pressure filling system
- Imported pneumatic drive elements
- Stainless steel construction
- Multi-head filling system
- Programmable logic controller (PLC)

### Suitable Applications

Japanese bean curd, Milk, Soya-bean milk, Peanut milk, Yogurt, Juices, Sauces

## Operational Controls

### Control Panel Settings

- Temperature regulation
- Speed adjustment
- Pressure control
- Manual/Auto operation modes
- Press, Withdraw, and Seal functions

## Safety & Compliance

### Safety Mechanisms

Emergency Stop • Protective Guarding • Safety Interlocks
