

Automatic Pouch Packaging Machine

This automatic packaging machine handles diverse pouch types, including cap, shaped, straw, stand-up, zipper, and spout pouches. It efficiently forms, fills, and seals pouches to accommodate various product types.

Product Overview

Versatile Automatic Pouch Packaging Solution

This automatic packaging machine is designed to handle a wide variety of pouch types, including shaped, stand-up, zipper, and spout pouches. Engineered for durability and hygiene, the unit is constructed with stainless steel to meet rigorous industry standards. Its user-friendly interface allows for precise control over packaging parameters, ensuring efficient and reliable performance for diverse product requirements.

Capabilities

Supported Pouch Types

Cap Pouch, Shaped Pouch, Straw Pouch, Stand-up Pouch, Zipper Pouch, Spout Pouch

Construction & Design

Key Operational Features

- Automatic forming, filling, and sealing
- User-friendly interface
- Precise parameter control
- High hygiene standards

Material

Stainless Steel
