

Automatic Powder and Spice Filling Machine

This automatic machine fills and packages powders and spices. It is suitable for packaging detergent powder, spices, and other granular products into sealed packets.

Overview

Versatile Powder Packaging Solution

This automatic powder filling and packaging machine is designed to streamline the production process for various powder products. It offers a fully automated workflow, handling tasks from bag making and measuring to filling, sealing, and date printing. Built for reliability and ease of use, it is an ideal solution for packaging food, daily chemical articles, and medicinal powders.

Operational Capabilities

Automated Functions

- Bag making
- Measuring and filling
- Inflating
- Counting
- Sealing
- Code printing
- Fixed-bag cutting

Control System

Single-chip control, Stepper motor, Optoelectronic eye, Language display screen

Technical Specifications

Compatible Packaging Materials

Polyester/Polyethylene, Nylon-compound membrane, Strengthen-compound membrane, BOPP

Construction Material

Stainless steel

Applications

Suitable Products

- Milk powder
- Soy milk powder
- Sesame walnut powder
- Five spices powder
- Oatmeal
- Glucose powder
- Non-sticky powders

Industry Application

Foodstuff • Daily Chemicals • Medicine
