Overview

Professional Powder Packaging Solution

This automatic powder packaging machine is engineered for the efficient and precise filling and sealing of various powdered products. Constructed with durable stainless steel for optimal hygiene, it features a volumetric filling system that ensures accurate dosing for consistent production. The unit is designed for versatility, making it an ideal choice for food, pharmaceutical, and chemical applications.

Technical Specifications

Material	Stainless Steel
Filling Mechanism	Volumetric Filling
Mobility	Yes

Operational Features

Adjustable Parameters

- Bag length
- Sealing temperature
- Filling volume

Applications

Suitable Industries	Food, Pharmaceuticals, Chemicals
