Product Overview

Automatic Powder Packaging Solution

This automatic powder packaging machine is engineered for efficient and precise filling and sealing of various powder materials. Featuring a robust stainless steel construction, it adheres to strict food production standards while offering versatile bag-forming capabilities. The system utilizes advanced PLC controls and adjustable settings to ensure accurate dosing and reliable operation across food, pharmaceutical, and chemical applications.

Technical Specifications

Bag Sealing Options

- Back Seal
- Three Side Seal
- Four Side Seal

Cut Styles

Tooth Shape • Flat Cut

Primary Material

Stainless Steel

Transmission System

Mechanical, Pneumatic

Operational Features

Suitable Materials

- Flour
- Milk Powder
- Spices
- Salt
- Seasoning

Control System

Programmable Logic Controller (PLC)

Safety Features

Emergency Stop, Protective Covers

Customization

Yes
