

Automatic Powder Filling Machine for Cosmetics

This automatic powder filling machine is designed for precise and efficient filling of cosmetic powders. It features stainless steel construction, a conical hopper for consistent powder flow, a digital control panel, an integrated weighing scale for accurate dosing, and a dispensing nozzle suitable for various container sizes.

Product Overview

High-Efficiency Powder Filling Solution

This fully automatic powder filling machine is engineered for precision, reliability, and high-speed operation. Designed to streamline the filling and packing process, it ensures trouble-free performance for various industries. Its robust construction and intelligent controls make it an ideal choice for businesses seeking efficient, accurate dosing of non-free flowing powders.

Applications

Compatible Materials

- Cosmetic powders
- Flour
- Coffee
- Masala (spice) powder
- Dry syrup powder
- Icing sugar

Suitable Industries

Cosmetics, Pharmaceutical, Food & Beverage, Chemicals

Technical Features

Construction Material

Stainless Steel

Key Features

- Conical hopper for consistent flow
- Digital control panel
- Integrated weighing scale
- Adjustable dispensing nozzle

Operational Focus
