Product Overview

High-Efficiency Powder Packaging

This fully automatic packing machine is engineered for the precise filling and sealing of various powdered products, including rice, wheat, corn flour, milk powder, and sugar. By automating the entire workflow from feeding to final package sealing, it significantly reduces labor requirements while maintaining consistent production speeds. Designed for high-volume industrial environments, it ensures reliable performance for 1kg packaging applications.

Technical Specifications

Package Weight	1 kg
Supported Materials	Rice Flour, Wheat Flour, Corn Flour, Milk Powder, Sugar

Operational Features

Automation Level

Fully Automatic

Key Operational Benefits

- Reduced labor costs
- Increased production speed
- Precise filling and sealing
- Consistent package quality
