

# Automatic Premade Bag Liquid Packing Machine

This automatic machine is designed for packing liquids into premade bags. It offers automated filling and sealing for efficient packaging.

## ADDITIONAL IMAGES

## Overview

A sophisticated packaging solution designed for efficient and precise filling of liquids into pre-made bags.

### Automated Liquid Packaging Solution

This high-performance automatic rotary packing machine is engineered for the precise filling and sealing of pre-made bags. Featuring advanced PLC control and precision indexing, it ensures consistent operation across various liquid, paste, and solid product types. The robust stainless steel construction guarantees hygiene and durability, making it an essential asset for food, beverage, pharmaceutical, and chemical production lines.

## Technical Specifications

High-performance interface allowing for quick changeovers and optimized performance.

Compact design optimizes floor space utilization, making it ideal for production lines with limited space.

### Production Capacity

**50 bags/min**

Minimum Speed

**120 bags/min**

Maximum Speed

**Model Number**

MRZK-160

**Material**

Stainless Steel

## Operational Features

Complete packaging solution featuring automatic feeding, filling, sealing, and output.

### Automated Quality Checks

- No bag feeding, no filling, no sealing
- No bag opening/opening error, no filling, no sealing
- No filling, no sealing

**Safety & Control**

PLC Control, Emergency Stop, Protective Enclosures, Frequency Conversion Speed Control

## Compatibility

### Supported Bag Types

Heat Sealable • Block Bottom • Zip-lock • Stand-up Pouch • Paper Bags

### Compatible Product Types

Category	Examples
Liquid/Paste	Detergent, soy sauce, juice, peanut butter, jam
Granular	Sugar, seeds, chemicals, capsules, fertilizer
Powder	Milk powder, glucose, seasoning, washing powder
Block/Solid	Fish, eggs, candy, chocolate, biscuits
Pickled	Kimchi, pickled cabbage, radish
