Overview

High-Efficiency Powder Packaging Solution

This automatic premade bag powder filling machine is engineered for precision and efficiency in packaging powder-based products. Featuring a robust stainless steel construction, it integrates a screw conveyor for automated feeding, a specialized bag feeding mechanism, and an adjustable dosing filling station. Designed to minimize labor costs and reduce product waste, this system ensures airtight sealing and consistent performance for food, pharmaceutical, and chemical applications.

Technical Specifications

Suitable Industries

Food • Pharmaceuticals • Chemicals

Construction Material

Stainless Steel

Automation Features

Screw conveyor feeding, Automated bag feeding, Adjustable dosing, Airtight sealing system

Operational Capabilities

Bag Compatibility

- Premade bags
- Bags with zip closures
- Bags with hanging holes
- Various film types (glossy/matte)

Performance Highlights

1 Adjustable

Dosing Accuracy

1 User-friendly

Operational Control
