

Automatic Pressure Booster Pump for Residential Use

This automatic pressure booster pump increases water pressure for homes and light commercial applications. It includes a pump, pressure tank, and control system for consistent water pressure.

Product Overview

High-Efficiency Automatic Booster Solution

The AUTO QB60 is a reliable pressure booster pump engineered for residential and light commercial water systems. By utilizing an integrated pressure tank and advanced control system, it delivers consistent, on-demand water flow for household taps, gardens, and irrigation needs. Its automatic startup and shutdown functionality ensures efficient operation, making it an ideal choice for maintaining stable pressure in small-scale distribution networks.

Technical Specifications

Model	AUTO QB60
Primary Applications	Residential Water Supply, Garden Irrigation, Light Commercial, Small Irrigation Systems

Key Features

Control System	Fully Automatic • On-Demand Pressure
Installation	Yes
