

# Automatic Reel Stretch Wrapping Machine with PLC Control

This automatic reel stretch wrapping machine is designed for efficient and secure packaging. It features a rotating platform and adjustable film tension for optimal wrapping performance.

## Product Overview

### High-Efficiency Reel Wrapping Solution

This automatic reel stretch wrapping machine is engineered for high-volume, professional packaging environments. Utilizing advanced PLC control, it ensures reliable performance and intuitive operation while significantly optimizing material usage through its integrated pre-stretch carriage. The machine is designed with a premium automotive-grade lacquer finish for durability and aesthetic appeal.

## Technical Specifications

Packing Diameter Range	500 mm
Max Packing Diameter	1500 mm
Machine Weight	10800 kg

## Operational Features

### Pre-stretch Rate

**300 %**

Pre-stretch Capability

Control System	Programmable Logic Control (PLC)
Available Customizations	Video System, Weight Monitoring, Label Printing System

## Quality and Standards

### Compliance and Standards

CE Certified
