

Automatic Refueling Lockstitch Sewing Machine for Thick Thread

This industrial sewing machine features an automatic refueling system for continuous operation. It is designed for heavy-duty lockstitch applications using thick thread.

Product Overview

Heavy-Duty Industrial Performance

This industrial-grade lockstitch sewing machine is specifically engineered for heavy-duty applications requiring thick thread. Featuring a robust construction, it ensures reliability in demanding production environments. The integrated automatic refueling system supports continuous operation, making it an ideal solution for sewing leather, heavy fabrics, and other tough materials.

Key Features

Core Capabilities

Automatic Refueling, Thick Thread Sewing, Heavy-Duty Construction, Industrial Grade

Applications

Suitable Materials

- Heavy Fabrics
- Leather
- Tough Industrial Textiles
