Product Overview

Automatic Retractable Running Boards

These automatic retractable running boards provide a convenient and safe solution for entering and exiting high-riding vehicles such as trucks, SUVs, and vans. Designed for durability and performance, the system features an electric motor that automatically deploys the step when a door opens and retracts it when closed. Built with robust materials and a non-slip surface, these boards enhance vehicle accessibility while maintaining a sleek, integrated look.

Key Features

Safety Features

Anti-pinch hand function, Overload protection, Automatic retraction, Non-slip surface

Construction & Materials

Material Composition

- Aluminum alloy construction
- Black powder-coated steel frame
- Tubular steel support bar

Surface Finish

Corrosion-resistant black powder coating

Technical Specifications

Mechanism

Electric motor and linkage system with integrated door sensors

Installation

Mounting brackets and electrical system integration
