

Automatic Rice Cooker with Non-Stick Pot

This rice cooker features a plastic body, cover, and base, along with an automatic cook and keep warm function. It includes a food-safe non-stick coating and comes with a measuring cup and serving spoon.

Overview

Efficient Automatic Rice Cooking Solution

This automatic rice cooker is designed for professional and domestic kitchens, featuring a durable plastic body and a high-quality non-stick inner pot. It offers seamless cooking and keep-warm functions to ensure rice remains at the perfect temperature until serving. With its user-friendly interface and safety-focused automatic shut-off, it provides a reliable and efficient solution for high-volume rice preparation.
