

Automatic Rice Cooker

This automatic rice cooker is designed for convenient and efficient rice cooking. It features a digital display, multiple cooking programs, a non-stick inner pot, a timer function, and a keep-warm function.

Product Overview

Professional Rice Cooking Solution

This automatic rice cooker utilizes electromagnetic surround heating to ensure uniform, rapid fire nutrient release for consistently delicious results. Featuring a 3.0mm steel composite homogeneous fire kettle with a 60-degree angle design, it delivers even heat distribution for soft and fragrant rice. The unit is equipped with an intelligent cooking program, a large LCD display with clock and timing functions, and a user-friendly touch interface, making it an efficient choice for professional kitchen environments.

Technical Specifications

Heating Method	Electromagnetic surround heating
