

Automatic Rotary Bag Filling and Sealing Machine

This automatic machine is designed for filling and sealing liquid and semi-liquid products into pre-made pouches. It utilizes a rotary filling system with multiple filling heads for efficient operation.

Product Overview

High-Efficiency Rotary Packaging

The PZ-16 automatic expansion bag filling and sealing machine is engineered for the high-speed, precise packaging of liquid and semi-liquid products. Featuring a robust rotary system with multiple filling heads, it ensures continuous and efficient operation for diverse production lines. The integration of advanced PLC controls allows for meticulous management of fill volumes and thermal sealing parameters, making it an ideal solution for the food, beverage, and pharmaceutical industries.

Technical Specifications

Filling Capabilities

- Liquid products
- Semi-liquid products

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)

Safety and Compliance

Operational Safety	Emergency Stop, Safety Interlocks
--------------------	-----------------------------------

Application Suitability

Industries

Food • Beverage • Pharmaceutical
