

# Automatic Rotary Filling Machine

This automatic rotary filling machine is designed for high-speed packaging applications. It features a stainless steel construction, a rotary filling system, and a conveyor system, making it suitable for filling various products into different container sizes.

## Product Overview

### High-Performance Rotary Filling Solution

This automatic rotary filling machine is engineered for high-speed packaging applications across the food, beverage, pharmaceutical, and chemical industries. Built with durable stainless steel, it ensures optimal hygiene and longevity in demanding production environments. The system features a versatile rotary design and integrated conveyor system, making it suitable for filling liquids, powders, and granular products into a variety of container shapes and sizes.

## Technical Specifications

### Target Industries

Food • Beverage • Pharmaceutical • Chemical

### Construction Material

Stainless Steel

### Filling Capabilities

Liquids, Powders, Granular Products

## Key Features

### Core System Features

- Automatic rotary filling system
- Integrated conveyor system
- Advanced filling parameter control
- High-speed operation
