Product Overview

Precision Shaped Powder Packaging

This automatic packaging machine is engineered for the precise filling, sealing, and cutting of powder products into unique, specialized sachet shapes. Constructed with durable stainless steel, it ensures high hygiene standards suitable for food and pharmaceutical applications. The system features an intuitive touchscreen interface, allowing operators to easily adjust parameters for various powder types and packaging dimensions, maximizing production efficiency and consistency.

Technical Specifications

Construction Material	Stainless Steel
Interface Type	Touchscreen
Automation Capabilities	Automatic Filling, Automatic Sealing, Automatic Cutting

Application Capabilities

Sample Packaging Applications

- Notoginseng Radix et Rhizoma Powder (Sanqi)
- Dietary Fiber Powder (Vegetable and Fruit Blend)

Typical Fill Weight

3 g

Sachet Weight
