Product Overview

High-Efficiency Shrink Packaging

The automatic shrink packaging machine is designed for seamless integration into production lines, offering high working efficiency. It automates the entire process of feeding, transporting, packing, sealing, and shrinking in a single operation. This system is ideal for industries such as food, beverage, and pharmaceuticals, providing a secure, tamper-evident finish for various product sizes.

Technical Specifications

Model Specifications

Feature	Model DQL-5545	Model SM4525
Voltage	220V/50-60HZ	220V/380V 50-60HZ
Power	3KW	10KW
Packing Speed	0-30pcs/min	0-20m/min
Machine Weight	330KG	185KG

Maximum Packing Dimensions

- $H < 130$
- $L + 2H < 550$
- $W + 2H < 450$
- $W 450 * H 250$

Cutter Dimensions

L 565 * W 460

Key Features

Operational Capabilities

Automatic Feeding • Continuous Operation • Adjustable Conveyor Speed • Temperature Control

Safety Features

Emergency Stop, Thermal Overload Protection, Protective Guards, Warning Labels
