Overview

Professional Automatic Shrink Wrapping Solution

This automatic shrink wrapping machine utilizes advanced heat-shrink technology to provide a secure, professional finish for books, soaps, and various daily necessities. By wrapping products in shrink film, it enhances visual appeal while offering essential protection against moisture, pollution, and external impacts. The system features direct infrared heating for energy efficiency and electronic stepless speed regulation, making it suitable for both regular and irregular item packaging.

Technical Specifications

Key Performance Metrics

24 m/min

Max Capacity (Wrapper)

16 m/min

Max Capacity (Tunnel)

250 °C

Max Sealing Temp

0.1 mm

Max Film Thickness

Machine Dimensions & Weight

Component	Dimensions (L×W×H mm)	Weight (kg)
Shrink Wrapper	1700×900×1400	320
Shrink Tunnel	1800×703×1260	220

Power Requirements

- Wrapper: 1.3 KW, 220V 50/60HZ
- Tunnel: 9 KW, 380V 50/60HZ

Operational Capabilities

Tunnel Advantages

- Direct infrared heating
- Compact design for space saving
- Short warm-up time
- Electronic stepless speed regulation
- High-quality shrinkage preservation

Compatible Materials

POF, PVC

Air Pressure

5 Kg/cm²
