Product Overview

High-Efficiency Shrink Packaging

This fully automatic, unmanned edge sealing machine is engineered for high-volume production environments, offering seamless integration of feeding, transporting, sealing, and shrinking. Featuring advanced PLC control and a constant temperature side-sealing system, it ensures consistent, reliable results for a wide variety of product sizes. Designed for flexibility and ease of maintenance, this machine helps optimize packaging workflows through precise electric eye detection and adjustable settings.

Key Features

Capabilities

Fully Automatic, Unmanned Operation, Continuous Sealing, Adjustable Size Settings

Technical Specifications

Sealing Technology

- Constant temperature side sealing knife
- Vertical drive for horizontal sealing knife
- POF film compatibility
- Adjustable film length control
- Automatic scrap coiling system

Control & Precision

1 Count

PLC Control Systems

Operational Details

Safety & Compliance

- Advanced PLC programmable controller
- Integrated safety protection
- Automated alarm device
- Emergency stop capabilities
- Thermal overload protection

Configuration Options

Component	Status
Front Power Feed Line	Optional
Rear Unpowered Storage Platform	Optional
Automatic Blowing Function	Optional
