Overview

High-Efficiency Shrink Wrapping Solution

This fully automatic edge sealing machine is designed for unmanned operation in mass production environments. It delivers high working efficiency with the ability to automatically feed, transport, bag, seal, and shrink products of varying heights and widths. The system ensures a professional finish with straight, firm seals suitable for POF and other industrial standard shrink films.

Technical Specifications

Automation Level

Fully Automatic • Unmanned Operation

Sealing Technology

- Constant temperature side sealing knife
- Vertical drive horizontal sealing knife
- Continuous longitudinal sealing
- Electric eye detection for film length

Operational Features

Control System

PLC Programmable, Safety Protection, Alarm Device, Manual Hand-wheel Adjustment

Compatible Films

POF and industrial standard shrink films

Maintenance & Efficiency

Operational Efficiency

0 Unlimited

Product Length Limit

Scrap Handling

Yes
