

Automatic Shrink Wrapping Machine

This automatic shrink wrapping machine is designed for efficient product packaging. It utilizes a sealing unit to wrap products in film, followed by a heat tunnel that tightly shrinks the film for a secure finish.

Overview

Industrial Shrink Wrapping Solution

This automatic shrink wrapping machine offers a comprehensive solution for efficient and secure product packaging. The system integrates a precision sealing unit with a high-performance heat shrink tunnel to ensure tight, professional-grade film application. Designed for industrial reliability, it features adjustable controls for conveyor speed and tunnel temperature, making it highly adaptable to various product sizes and film types.

Technical Specifications

Core Components

- Sealing Unit
- Heat Shrink Tunnel
- Adjustable Conveyor System

Operational Controls

Adjustable Conveyor Speed, Temperature Control

Design & Build

Construction

Industrial Grade • Durable Materials

Mobility

Yes
