Overview

High-Efficiency Sleeve Labeling System

This automatic sleeve label applicator provides precise and stable labeling for high-speed packaging lines. Featuring a unique cyclotron cut-off mechanism and advanced electronic eye sensors, it ensures exceptional film cutting accuracy. The system is highly adaptable, supporting various container shapes including round, square, and irregular profiles for industries such as beverage, pharmaceutical, and cosmetics.

Performance Metrics

Operational Capacity

450 bottles/min
Max Speed

400 kg
Machine Weight

3 kW
Power Rating

Technical Specifications

Production Parameters

Specification	Range
Bottle Diameter	50~125mm
Bottle Height	100~320mm
Label Thickness	0.03~0.08mm
Label Length	30~190mm

Label Compatibility | PVC, PET, OPS

Key Features

System Capabilities

- Cyclotron cut-off adjustable cutter head
- Double positioning central column for stable conveyance
- Synchronous bottle distributor preventing sloshing
- Touch screen control cabinet
- Electronic eye sensor for high cutting accuracy
