

Automatic Soap Dispenser with Transparent Reservoir

This automatic soap dispenser has a 400ml capacity. It operates on DC battery power and has a compact design.

Product Overview

Hands-Free Hygiene Solution

This automatic soap dispenser is designed for modern, hygienic environments, featuring a responsive electronic sensor for touchless operation. The sleek design includes a transparent reservoir, allowing for easy monitoring of soap levels at a glance. It is an efficient and gentle solution suitable for both residential bathrooms and professional kitchen settings.
