

Automatic Soft Drink Vending Machine with Cup Dispenser

This vending machine features a European design with a mini size and micro control for convenient use. It is designed for dispensing soft drinks with an automatic cup dispensing mechanism.

Overview

Professional Beverage Solution

This compact automatic vending machine is designed for seamless soft drink dispensing in controlled environments. Featuring a token or coin-operated payment system, it offers a reliable solution for high-traffic commercial spaces. The unit is engineered for convenience, providing three distinct drink options with a user-friendly interface and automated cup delivery.
