

Automatic Steamed Bun Production Line

This automated production line efficiently produces steamed buns. It integrates dough mixing, shaping, and steaming processes for high-volume output.

Overview

Automatic Steamed Bun Production Line

This comprehensive production line is designed for the efficient, high-volume manufacturing of steamed buns and similar products. The integrated system streamlines the entire process by combining a mixer, continuous pressing machine, dough twist machine, and a precision dough forming machine. Engineered for stability and high-speed operation, this line ensures consistent product quality while maintaining strict food safety standards.

Performance & Capacity

Performance Metrics

6000 pcs/hr

Max Capacity

5.5 KW

Power

Technical Specifications

Detailed Technical Data

Model	Voltage	Dimensions	Net Weight
HD-900	220V	6626x1353x1425mm	800KG

Features & Construction

System Components

- Mixer Machine
- Continuous Pressing Machine
- Dough Twist Machine
- Dough Forming Machine

Key Advantages

High Efficiency, Low Noise Operation, Food Safety Compliant, Compact Structure, Easy Maintenance
