

Automatic Stone Slab Polishing Machine

This automatic multi-head polishing machine is designed for processing stone slabs. It utilizes a programmable logic controller (PLC) for automated operation and multiple polishing heads for efficient material removal.

Product Overview

Professional Stone Slab Polishing

This automatic stone slab polishing machine is engineered for high-efficiency continuous grinding and polishing of marble and stone slabs. Utilizing an advanced PLC control system with an LCD interface, operators can precisely manage processing parameters for consistent, high-quality results. The system includes integrated safety features such as trouble alarms and abrasive consumption monitoring to ensure reliable operation and optimized maintenance.

Control & Automation

Control System	PLC Terminal Control System
User Interface	LCD Screen
Automation Capabilities	Trouble Alarm, Abrasive Consumption Alarm, Automatic Head Movement

Operational Parameters

Adjustable Parameters

- Processing Width
- Grinding Head Working Pressure
- Conveyor Speed
- Cross Beam Speed

Speed Control	Frequency Converter Adjustment
Grinding Heads	16 heads

Application

Suitable Materials

Marble • Granite • Natural Stone • Artificial Stone
