

Automatic Stretch Wrapping Machine

This automatic stretch wrapping machine is designed for efficient and secure pallet wrapping. It features adjustable tension control and programmable wrapping patterns for customized packaging solutions.

Overview

High-Efficiency Pallet Wrapping

This automatic stretch wrapping machine is engineered for high-volume packaging operations, providing efficient and secure load stabilization. Featuring a rotating turntable and a vertically moving film carriage, it ensures consistent and even film application across every pallet. The system includes adjustable tension control and programmable wrapping patterns, allowing for customized packaging solutions tailored to specific load requirements.

Key Performance Metrics

Performance Highlights

1 Automatic

Operation Type

1 Rotating Turntable

Wrapping Mechanism

Technical Capabilities

Wrapping Features

- Adjustable tension control
- Programmable wrapping patterns
- Vertical film carriage movement
- Even film application

Application

Ideal Industries

Logistics, Warehousing, Manufacturing, Distribution
