

Automatic Submerged Arc Welding Machine

This heavy-duty automatic submerged arc welding machine is designed for robust industrial applications. It is mounted on wheels and features adjustable parameters and digital displays for optimized welding.

Overview

Industrial Submerged Arc Welding System

This heavy-duty automatic submerged arc welding machine is engineered for robust industrial performance and high-volume production environments. It features precise digital control over current and voltage parameters, ensuring optimized weld quality and deep penetration. Designed for continuous operation, the system includes built-in output terminals and mobility features, making it a reliable solution for demanding welding tasks.

Technical Specifications

Connection Points

- Built-in output terminals
- Positive polarity terminal (+)

Model Designation

MZ-1000

Control Interface

Digital Current Display, Digital Voltage Display, Adjustable Parameters

Operational Features

Status Indicators

Power • Ready

Key Performance Metrics

1000 A

Rated Capacity

Mobility

Yes
