

# Automatic Sugar Sachet Packing Machine

This automatic packing machine is designed for sugar sachet production. It offers a simple operation and reduces manpower requirements.

## ADDITIONAL IMAGES

## Overview

Machines are securely wrapped and crated in wooden pallets to ensure safe international transit.

## High-Efficiency Automatic Packaging Solution

This fully automatic sachet packing machine is designed for high-speed, precision packaging of granular and solid food products like sugar and potato chips. It integrates weighing, bag forming, filling, and sealing into a single seamless process, significantly reducing manpower requirements while maintaining high quality control. The system features a robust stainless steel construction and a user-friendly interface for reliable, long-term industrial performance.

## Key Performance Metrics

### Performance Highlights

**0.65 Mpa**  
Air Pressure

**3 m3/min**  
Air Consumption

## Technical Specifications

Model Type	SK-220DT
System Type	Combined Weighing Full Automatic Packing System

## Bag Dimensions

Bag Length Range	80-300mm
Bag Width Range	80-200mm

## Film Specifications

Packing Film Width	180-420mm
--------------------	-----------

## Construction & Materials

The system features a 304 stainless steel multi-head electronic weigher and an intuitive English display for precise parameter control.

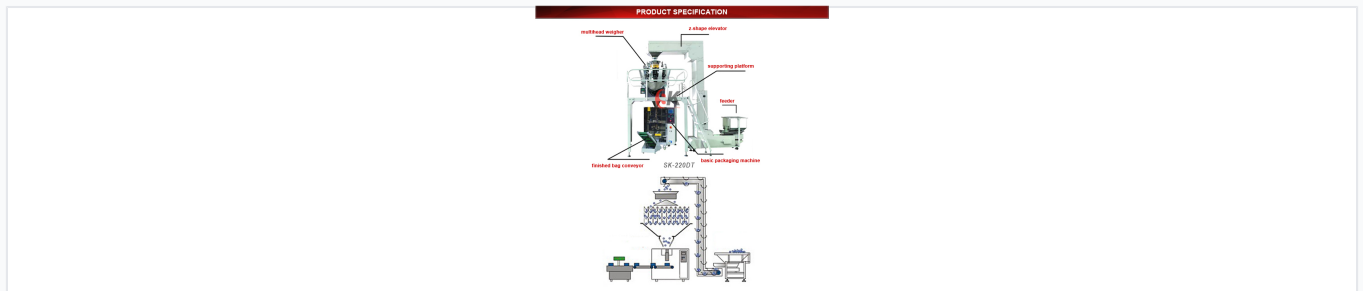

### Material

Food Grade 304 Stainless Steel

### Control Interface

English display screen for parameter setting

## System Components

Complete automated line including Z-shape elevator, multihead weigher, and finished bag conveyor.

### Included Components

- Multihead weigher
- Z-shape elevator
- Supporting platform
- Feeder
- Finished bag conveyor
- Sealing mould
- Blade cutter

## Capabilities

The machine supports various sealing forms including center, three-side, and quad seals to meet diverse market needs.

### Available Sealing Forms

Center Seal, Three-side Seal, Quad Seal

## Service & Support

### After-Sales Services

- One year quality warranty
- Lifetime technical support
- Free installation training at factory
- Instruction manuals and videos provided
- Technician dispatch available for on-site setup

## Advantages

### Operational Benefits

High Quality Control, Prompt Delivery, Small Order Acceptable, ODM/OEM Accepted, Less Manpower Required
