

Automatic Swing Gate Opener System

This automatic swing gate opener system is designed for residential or commercial gates. It features dual operators for synchronized opening, durable construction for outdoor use, and a security system to prevent unauthorized access.

Product Overview

Professional Swing Gate Solution

This automatic swing gate opener system is engineered for reliable performance in both residential and commercial applications. The system features advanced motor technology that supports soft start and slow stop functionality, ensuring smooth operation and longevity. With broad compatibility including smartphone app control, mobile integration, and battery backup, it provides a comprehensive security solution for various gate configurations.

Technical Specifications

Opening Angle

180 degrees

Maximum Opening Angle
