Product Overview

High-Efficiency Packaging Solution

This automatic tablet and capsule packaging machine is engineered for precision and reliability in pharmaceutical and food packaging environments. Utilizing a servo motor, PLC control, and a touch screen interface, it ensures stable, accurate filling while minimizing maintenance requirements. Its robust, air-compressor-free mechanical design offers long-term durability with an expected lifespan of 15-20 years, providing a cost-effective solution for high-volume production.

Technical Specifications

Control System	PLC with Touch Screen Interface
Drive Mechanism	Servo Motor
Expected Lifespan	17.5 years
Key Features	Servo Driven, PLC Controlled, No Air Compressor Needed, Stainless Steel Construction

Operational Capabilities

Safety Features

- Emergency stop buttons
- Safety guards
- User-friendly setup interface

Packaging Type	Vertical Form-Fill-Seal (VFFS)
Mobility	Yes
