

Automatic Textile Screen Printing Machine

This automatic textile screen printing machine is designed for high-volume, multi-color garment decoration. It utilizes a rotary indexing system and individual print heads for precise operation on various fabric types.

Overview

High-Efficiency Textile Printing

The YH series is a high-performance automatic textile printing solution designed for professional print workshops seeking increased output and faster ROI. Equipped with servo-driven indexers and intelligent micro-processor controls, these machines offer superior print quality with minimal maintenance requirements. With a robust safety system and user-friendly interface, it supports versatile applications including T-shirts, sleeves, and bags.

Technical Specifications

Performance Metrics

900 pcs/h

Max Output

500 mm

Max Image Area Width

700 mm

Max Image Area Height

Detailed Technical Parameters

Feature	Value
Pallet Size	600x800mm
Frame Size	700x1000mm
Dryer Power	13.5Kw

Certifications

CE

Available Models

4-6/8, 4-8/10, 6-10/12, 6-12/14, 6-14/18

Control & Automation

Key Control Features

- Full color touch screen interface
- Onboard self-diagnostic and alarming system
- Real-time production data tracking
- Job memory facility for parameter restoration
- Built-in USB port for software upgrades

Safety & Mechanics

Operator Safety Systems

- Safety cords between print heads
- Four safety bars at load/unload stations
- Skip-shirt smash buttons
- Hundredth-of-a-second indexer stop trigger
