最大轮径	Max. wheel diameter	1040mm
最大轮宽	Tire width	3"-15"
工作压力	Working pressure	8-10bar
电源	Voltage	380v/220v/110v
电机功率	Power	0.75kw/1.1kw

## Overview

### Professional Automatic Tilt-Back Tire Changer

This robust tilt-back tire changer is engineered for professional automotive environments, offering efficient and ergonomic tire servicing for rim diameters between 10" and 24". It features a high-durability construction with a hard-chrome plated working head and protective components to prevent rim damage during operation. Designed for precision and ease of use, the machine incorporates a central pressing function and a self-centering turnplate to streamline the mounting and demounting process.
