

Automatic Tire Changer with Tilt Column and Helper Arm

This automatic tire changer features a tilt column design and a right helper arm. It is capable of handling wheels up to 24 inches in diameter.

Product Overview

Automatic Tire Changer with Helper Arm

This high-performance automatic tire changer is engineered for professional automotive service environments. Featuring a pneumatic tilt-back column and an integrated right helper arm, it simplifies the demounting and mounting of stiff, low-profile tires. Built with durable materials including high-strength steel mounting heads and a 40A universal switch, this machine ensures long-term reliability and heavy-load capacity.
