

Automatic Toothpaste Cartoning Machine

This automatic cartoning machine is designed for packaging toothpaste cartons. It automates the process of loading toothpaste tubes into cartons, folding the cartons, and sealing them.

Overview

High-Efficiency Toothpaste Cartoning Solution

The HZJ200B is a specialized automatic cartoning machine engineered to streamline the packaging of toothpaste tubes. It automates the entire sequence of loading tubes into cartons, folding, and sealing, ensuring consistent output and hygiene. Built with a robust stainless steel frame and advanced PLC control, this machine offers precise synchronization and operational reliability for high-volume production environments.

Technical Specifications

Machine Type	Automatic Cartoning Machine
Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)

Operational Features

Core Capabilities

- Automatic tube loading
- Carton folding
- Carton sealing
- Versatile size/shape handling

Interface Adjustability

- Carton size
- Operating speed
- Sealing temperature

Safety Systems	Emergency Stop, Safety Interlocks
----------------	-----------------------------------
