

Automatic Touchless Basin Faucet

This automatic faucet features a touch-free design with an infrared sensor. It is suitable for commercial and residential applications, promoting hygiene and water conservation.

Product Overview

Automatic Touchless Basin Faucet

This automatic touch-free faucet utilizes advanced infrared sensor technology to enable hygienic, hands-free hand washing. Designed with a sleek chrome finish and a wall-mounted configuration, it seamlessly integrates into both commercial and residential environments. The adjustable sensor range ensures optimal performance, while the touchless operation promotes superior sanitation and significant water conservation.
