

Automatic Transfer Switch 100A

This automatic transfer switch is designed for seamless power source switching. It features a 100A current rating and is suitable for various electrical applications.

Overview

Reliable Power Continuity

This automatic transfer switch is engineered for seamless power source switching in critical distribution and motor networks. Designed for 400V systems, it ensures uninterrupted power supply by automatically managing transitions between main and standby power sources. It is an essential component for fire protection systems, hospitals, banks, and high-security buildings where power reliability is paramount.

Rated Current

Voltage Specifications

Parameter	Value
Rated Voltage	400V
Control Voltage	220V
Frequency	50Hz / 60Hz

Operational Features

Operation Modes

- Automatic Mode
- Manual Mode
- Disconnecter Function

Safety & Compliance

CE Certified, Lockable Mechanism, IEC 60947-6 Compliant
