

Automatic Transfer Switch

This automatic transfer switch provides seamless power transfer in critical applications. It is designed for industrial and commercial use, ensuring uninterrupted operation during power outages or maintenance.

Product Overview

Reliable Power Continuity

The FKZQ series automatic transfer switch is designed to ensure uninterrupted power for critical loads by seamlessly switching between city power and generator supply. Utilizing a high-precision control system, it offers versatile operation through either electromagnetic relay or intelligent digital DCU options. This system prioritizes reliability, adjustable parameter management, and user-friendly operation to maintain continuous performance during power outages.

Technical Specifications

Transfer Modes

- Automatic transfer
- Manual transfer

Key Performance Metrics

1 high

Precision Level

1 high

Reliability

Control System Types

Electromagnetic Relay, Intelligent Digital DCU

System Protection

Protection Features

- Overload protection
- Short circuit protection
- Adjustable voltage settings
- Adjustable frequency settings
