

Automatic Vertical Form Fill Seal Packaging Machine

This automatic vertical form fill seal packaging machine efficiently packages granular and powder products. It features a PLC control system with touch screen interface, adjustable bag sizes, and high-speed operation.

Overview

Automatic Vertical Form Fill Seal Packaging Machine

This high-performance vertical form fill seal machine is engineered for the efficient packaging of non-free-flowing powders and granular products. It features an advanced PLC computer system for stable operation and precise parameter adjustments without the need to stop production. Designed for versatility, it supports various packing types including pillow sealing and standing bags, making it an ideal solution for coffee, milk powder, flour, and baking powder processing.

Technical Specifications

Control System	PLC computer system with English and Chinese screen display
Temperature Precision	1 °C
Film Drawing Mechanism	Servo motor for accurate positioning

Operational Features

Integrated Functions

- Bag-making
- Sealing
- Packing
- Date printing

Noise Level

Quiet operation • Low noise

Supported Packaging Styles	Pillow sealing, Standing type, Punching
Compatible Film Materials	PE film, Various mix films

Application Suitability

Suitable Products

- Cocoa
- Coffee
- Baking powder
- Talcum powder
- Ground coffee
- Milk powder
- Flour
- Maize powder
- Manioc flour
