

Automatic Vertical Pouch Filling and Capping Machine

This automatic vertical pouch filling and capping machine is designed for high-speed automated packaging of liquid and semi-liquid products into pre-made pouches. It integrates pouch feeding, filling, sealing, and capping operations into a single, continuous process.

Product Overview

High-Efficiency Automated Filling and Capping

The ZPZD-1200 is a sophisticated automatic vertical pouch filling and capping solution engineered for high-speed, continuous packaging operations. Designed for liquid and semi-liquid applications, this machine integrates pouch feeding, precise volumetric filling, sealing, and capping into a single streamlined process. Its robust stainless steel construction meets rigorous hygiene standards, making it ideal for the food, beverage, pharmaceutical, and cosmetic industries.

Performance Metrics

1200 Type

Model Series

Key Capabilities

- Automated pouch feeding and filling
- Integrated capping station
- Volumetric filling system
- PLC-based control system
- Adjustable temperature control
- Safety interlock system

Construction & Design

Material Standards

Stainless Steel Construction, Compact Footprint, Industrial Grade

Applications

Industry Compatibility

Food & Beverage • Pharmaceutical • Cosmetic
