Product Overview

Professional Voltage Stabilization

This automatic voltage stabilizer is engineered to provide reliable, stable power for sensitive equipment, including Hi-Fi systems. It features advanced zero-cross switching technology and digital CPU control to ensure consistent performance. Housed in a durable, full-metal cabinet, the unit includes comprehensive protection features and a buzzer alarm to alert users to power abnormalities.

Electrical Specifications

Output Voltages

Output Type	Tolerance
110V	±9%
220V	±5%

Input Voltage Range	150-260Vac
Frequency	50 Hz
Efficiency	98 %
