Overview

Integrated Bottling Solution

This automatic water bottling machine offers a comprehensive 3-in-1 solution, seamlessly integrating rinsing, filling, and capping into a single monobloc unit. Designed for efficiency and hygiene, it is ideal for mineral and pure water production lines. The system features advanced PLC control and precise filling technology to ensure consistent, leak-free performance.

Performance

Production Capacity

8000 b/h

Minimum Capacity

10000 b/h

Maximum Capacity

Reference Bottle Volume

500 ml

Technical Features

Process Details

- Spring-type rinsing clamp for inside/outside bottle cleaning
- Magnetic torque-type cap screwer
- Three-stage rinsing process
- Automatic robotic arm bottle handling

Key Automation Features

PLC Control, Touch Screen Interface, Fixed Liquid Level Filling, No Bottle No Wash, No Bottle No Fill
