

# Automatic Water Pressure Booster Pump

This automatic water pressure booster pump is designed for efficient water transfer and pressure boosting. It is equipped with an electronic control system that automatically starts and stops the pump based on water demand.

## Product Overview

### High-Efficiency Pressure Boosting

The SSB-2A is a fully automatic water pump engineered for reliable water transfer and consistent pressure boosting. Featuring a robust stainless steel body and an intelligent electronic control system, it automatically manages start/stop cycles based on real-time demand. This design prevents dry running and ensures optimal performance for domestic supply, irrigation, and general pressure boosting applications.

## Technical Specifications

### Operation

Fully Automatic • Dry Run Protection

Body Material	Stainless Steel
Control Interface	Electronic with Digital Display
Installation	Indoor, Outdoor, Compact Design

## Applications

### Suitable Applications

- Domestic water supply
- Agricultural irrigation
- Pressure boosting systems
