

Automatic Water Pressure Booster Pump

This automatic water pressure booster pump increases water pressure in residential and commercial applications. It is designed for clean water to boost pressure to showers, taps, and other outlets, ensuring consistent water flow.

Product Overview

Professional Pressure Boosting Solution

This automatic water pressure booster pump is engineered for reliability and compactness, making it an ideal choice for domestic water distribution. Designed specifically for clean water applications, it effectively services pressure sets, garden irrigation, and tank water extraction. The unit includes an integrated flap-check valve and ensures consistent performance when installed in sheltered environments.

Technical Specifications

Power Rating

0.37 kW
Power Output

0.5 HP
Horsepower

Rated Voltage

220 V

Operating Conditions

Installation Requirements

- Enclosed environment
- Sheltered from inclement weather
- Suitable for domestic applications

Compatible Fluids

Clean Water, Non-aggressive liquids, Free of abrasive particles

Key Features

Product Highlights

Automatic Operation • Integrated Flap-Check Valve • Compact Design • Reliable Performance
